

SWE 363

Assignment 4 – Personal Portfolio Web Application

Lama Al
Thunayyan

Project Overview

- Final version of my portfolio website
- Combines all concepts from previous assignments
- Focus on interactivity, API integration, and user experience
- Designed as a real-world web application

Key Features

- Project filtering and sorting
- Interactive project modal (View Details)
- GitHub API integration
- Form validation with user feedback
- Dark/Light mode
- Responsive design

Live Website

<https://lama-althunayyan.github.io/202275940-lamaAlThunayyan-assignment4/>

Technical Highlights

- JavaScript used for dynamic interaction
- API integration using fetch()
- State management using localStorage
- DOM manipulation for modal and filtering

Challenges & Learning

Challenges:

- Implementing the project modal
- Handling API data and errors

What I learned:

- How to build interactive UI components
- How to integrate external APIs
- How to improve user experience

thank you
